ANEMONE FACTS

- This is a pretty animal called an anemone coral.
- Anemones come in many different colours.
- Anemones are sea animals.
- They don't move around - just sit and wait for their food to float past in the water.
- Then they use their tentacles to catch the food.
- Special fish called 'nemo's live inside the tentacles.

1 How many fish look like this?

2 What is the total number of fish in the picture?
